

SWIM-MASTER

VOL IX - No 6 USA NATIONAL PUBLICATION FOR MASTERS SWIMMERS JULY - AUGUST 1980

I'M IN OVER MY HEAD

by ANGIE SINACORE

I looked over the checklist one more time - swim suits, sweat suits... and do not forget a FLASHLIGHT. As I packed the towels, swim goggles and the weeks supply of camp clothes, it all had a familiar, yet different ring. This time, the kids were not going to camp, I was. A middle aged mother! After all those years of watching and cheering our kids at track meets, horse shows, soccer and basketball games, it was suddenly going to be my turn to compete.

The 2-1/2 hour drive to swim camp was filled with anticipation. It had been thirty years since I spent a week at camp and I was not sure what to expect. I thought of myself as a "strong swimmer" after all, as a child didn't I see every Esther Williams movie three times!! As I approached my destination, the level of anxiety mounted and I began asking myself, "how did I get into this...and more appropriately, WHY?"

Maintaining a level of fitness is simply a way of life for our family. A ten mile bicycle ride, a raquetball session, golf or a swim is part of the daily routine. I had been swimming laps of the pool for sometime and at age 42 decided that 42 lengths would make a good workout. Each birthday I would add another lap. I secretly relished the idea that I'd be the only 80 year old woman who could swim 80 laps of a pool! Was I in for a surprise to learn that other 80 year old women did swim and in fact are swimming competitively. For example, in the 80+ age group for women, the 1979 AAU National best times for 100 yard freestyle is 2:20.80; for 100 yards of the backstroke it is 2:23.68; and for the 100 yds of the breaststroke it is 3:06.11. A timely article in Family Health (February 1979) introduced me to Masters Swimming and that's how come I was going to camp!

Dr. Art Mayer, the Mid Atlantic Masters Swimming Chairman sums up the program as a fun physical fitness plan to encourage adults over 25 to swim regularly hoping to gain many important physical and mental health benefits. The list of these benefits includes improved cardiovascular and respiratory efficiency, help in the prevention of coronary heart disease, lowered blood pressure, relief from the normal tensions of the day, assistance in weight reduction and control programs and finally improved muscle tone with a better general physical appearance.

As I read the article I thought, so far so good. Those were all the reasons for which I was swimming. Masters swimmers, I learned, were men and women 25 years to 80 plus years old. They were retired, working, rich, poor, some swimming for the first time in their lives, others former olympic and national champions, former high school and college swimmers and handicapped persons as well. It seemed that Masters Swimming was truly an "equal opportunity employer!"

There are several phases to Masters Swimming. The "competition" can be that of swimming "against the clock" or at a local or regional meet. Lap swimming competition is done individually with timers and judges to attest the performance. The swim time is then phoned into the competitor who may be swimming in a different city and thus a "winner" determined. The other phase of Masters swimming is competition as we generally know it. Swimmers are divided into 5 year age groups starting at 25-29 years and going to age 90 or more. Those over 90 are in a class all by themselves.

Masters swimmers compete in four basic strokes - freestyle, backstroke, breaststroke and butterfly - and at several distances. As swimmers become more fit and advance from novice to accomplished swimmers, the improvement in one's time for 50 meters of freestyle, for example, can be most rewarding.

There was a good deal of teasing prior to my camp departure. It seemed our 19 year old told everyone in our small community that her mother was going to camp - not she! I'd be greeted in the supermarket with, "Hi Angie, I hear you're going to camp!..." followed by much laughter. Our 25 year olds got into the act too, and insisted I sew name tags in all my clothes. Evidently, I was not the only one who got teased. A 66 year old campmate was given a farewell party by all his friends. His wife thought since he had been "deprived" of a camp experience as a young boy it was better late than never and arranged for a royal sendoff. A vice principal in a school in Massachusetts usually spent her summers traveling throughout Europe, Russia, Etc. This year when her friends asked where she was going, she replied, Great Valley. When they asked what country that was in, she had to explain it was in the Enchanted Mountains of New York state - and she was not going to be a tourist, but a swimmer!

The miles were clicking away when a large dark brown wooden sign that said SKWIM loomed in front of me and I realized my adventure was about to begin. In smaller letters below SKWIM I read PERSEVERE. Ahead of me I saw a very narrow, uphill, dirt road and for the moment wondered if one needed to persevere merely to find the camp amidst the enchanted mountains or whether it was going to be the camp philosophy. After the first workout in the pool, I knew it was camp philosophy...for persevere I did!

I met the camp director, John Skehan* who warmly welcomed me. I finally understood where the word SKWIM was coming from. This camp is run by the beautiful Skehan family, Joh, Joanne, 8 children and two Irish setters - O'Brien and Shannon. The SK from Skehan plus swim equals one unique place called SKWIM. Coach Skehan showed me where the women's bunkhouse was located and said, "make yourself at home." As I unrolled my sleeping bag on a lower bunk in this somewhat spartan bunkhouse, I had that strange question come up again - what was I doing here in the 49th summer of my life?

I had enrolled in a Masters Development Camp for people who have a keen sense of the value of swimming. I chose to be there for one week with Masters swimmers from all over the country to develop some competency in all four competitive swim strokes. For the more experienced swimmers SKWIM fulfilled the need to train in a group. Generally speaking there are not great concentrations of Masters Swimmers in any one location. One usually trains by oneself without the benefits of that "team spirit" or a trained coach. SKWIM afforded us the opportunity to "take our marks" together, develop a four stroke competency and to be under the watchful eye of excellent coaches. Some of my campmates were seasoned competitors and had been swimming in meets for several years. Some of us were novices and had never experienced the "starting block butterflies" that come when the starter says, TAKE YOUR MARKS.

* John Skehan Associate Professor of Physical Education
St. Bonaventure University
Master Coach - College Swimming Coaches Association
Associated with NCAA Division I for 21 years

The camp day had begun and after breakfast there was a lecture at the Skwim Talking Tree. The Talking Tree was an aging apple tree that was at one time part of an orchard. It was now the meeting place for swimmers to learn from their coaches the "secrets of the trade". After this initial lecture where staff was introduced and the stroke of the day discussed, we walked down the hill to the pool. The pool was a swimmer's dream come true. It consisted of a fifty meter long course pool with an adjacent 25 yard pool..it's crystal clear water reflecting the blue sky that hovered over this mountain top haven was awesome.

In no time we were in the pool warming up with 200 meters of freestyle. That's 4 laps of a 50 meter pool or approximately 8 laps of the 25 yard pool I was used to swimming in. As I "freestyled" my way down that first lap, I kept thinking to myself, where is the end of the pool? After swimming in a 25 yard pool, a 50 mtr pool looks...and feels endless! We followed this with 100 meters of breaststroke, 100 meters of backstroke, 100 meters of the crawl kick and a repeat of 100 meters of breaststroke. Since we were men and women of all different ages, 25 to 72 years and different levels of swimming ability, the staff individualized much of our training. In retrospect, I marvel at how this was done, for we were all part of the group, yet progressing individually.

At this point in the morning workout, we were singled out for videotaping. This was a unique experience for all of us. With TV camera rolling and coach John Skehan commenting on our strokes into a cassette tape recorder, we "did our thing". For some reason 100 meters of the freestyle with a camera focused on me seemed a lot longer than any other 100 meters I had done that morning. We would get a chance to see our tapes and hear the comments at the evening's "cracker barrel" session. We all felt the videotaping was an invaluable teaching tool even though some of us cringed when we saw ourselves swimming on "TV". It was finally lunchtime and our comments during lunch reflected what a busy morning we had had and some of us wondered how we'd make it till sundown.

An hour's rest followed lunch and at 2 p.m. after some stretching exercises we were back in the pool. We warmed up with 200 meters of the crawl and then the new terminology started to fly. "100 meters each KPS"...I felt like the dumb rookie in the group. What does KPS mean? Since this day we were working on the crawl stroke, it meant we did 100 meters of the Kick (flutter), 100 meters of the Pull (or arm stroke alone) and 100 meters of the entire Stroke. In addition we were introduced to hypoxic breathing. Whereas most swimmers will breath on each stroke cycle, we were being asked to breathe in a prescribed pattern, that is, on every one, two or three cycles. In swimming the crawl, breathing on one side becomes a routine movement and for most swimmers a very comfortable arrangement. However, when your competition is swimming on your blind side (the side you do not turn to) and you need to keep tabs on his/her whereabouts, it is important to be able to breathe on either side when you are competing. The term bilateral breathing began to make sense, though it was more difficult for me to perform than to understand.

We counted the number of arm strokes it took us to get from one end of the pool to the other. We counted the number of seconds it took to reach the far end and then counted our pulse beats per minute. In fact, if I learned anything that first day, it was that from here on in the CLOCK and I would develop an intimate relationship. It was goodbye to my Esther Williams stroke and time to get down to business. It took me 1:06 to do 50 meters of freestyle. When I checked the long course records for 1979, I found the record for 50 meters of freestyle for women aged 50-54 was 33.7. When I wrote my first camp letter home that night, my parting words were, "I'm in over my head...blub...blub!"

We ended the afternoon session with 600 meters of the crawl and headed to the bunkhouse for still another change of clothes and preparation for dinner. After all the swimming we did, we arrived to the dining hall at a little slower pace than we did for lunch and were welcomed by the most incredible home cooked aromas. This did not look like a camp meal nor did it taste like a camp meal. Our cook was something special and she even prepared big glass jars filled with homemade cookies for our evening "cracker barrel" session.

Our day was not over yet. A stroke analysis movie was scheduled for 6:45 p.m. and then back in the pool by 8 p.m. We worked on turns, breakouts and finishes. We had to break out with a proper glide, no breath and with determination. Our finishes had to be fierce, with conviction, no slowing down as you anticipated the wall. In order to practice these, we would start swimming about 20 yards from the end of the pool and at the 15 yard mark we'd pour on the steam as Coach Skehan bellowed, "Give me a Bonaventure finish". My finishes were more the junior high school type finish than a college finish...but persevere I did! These finishes were hardly what a manicurist would recommend and the next day I was beginning to wonder how I was going to explain all the black and blue places on my body as well as the broken fingernails. We all tried swimming with the lights that evening. This was a unique underwater pacing device which enabled us to swim pool lengths at whatever preselected speed we wanted. You simply swam a pool length trying to keep up with the lights as they flashed on beneath you. There were 28 light references per 50 meters. I felt like the greyhound trying to catch the rabbit and never quite getting there.

At night, the campfire felt so warm in contrast to the cool mountain air. The hushed conversation centered on Masters Swimming. Those who had already competed shared their experiences with us. We also talked about how to be your own coach when we returned home, i.e. what makes for a good workout and how often to swim. It was a revelation to me to be in an environment where women in a "matter of fact" manner admitted their ages. Once you told someone your name, the next question was, "what stroke do you swim...and in what age group?" The real clincher came when I heard how anxious these women were to be a few years older so they could swim in the next age group! I thought to myself, am I hearing this right? What happened to the panic that is supposed to hit women on the threshold of their fiftieth birthday? What happened to the empty nest syndrome? What happened to the "depression" when the ophthalmologist says you need bifocals? I guess this is when I decided to stay with Masters Swimming. I giggled at the thought of being a TIGER at 72!

In spite of the campfire, the good conversation and the cook's homemade cookies, our weary bones and muscles urged us to head to the bunkhouse. I had only been at camp one day, but already my bunk mates felt like long-time friends. We made our final walk in the dark back to the bunkhouse using our flashlights as we would seeing eye dogs. What I thought of as a "spartan" bunkhouse suddenly took on the look of the Waldorf Astoria. My flashlight skimmed across my inviting sleeping bag stretched neatly over my bunk. I relished the thought of getting into something dry and warm. A postscript to my prayers that night was the hope that one of my bathing suits would be dry by 7 a.m. the next morning for Dawn Patrol (our pre-breakfast swim). It had been a long day and at times I thought I was seeing flashing lights telling me my "circuits" were overloaded. I had learned so much already...and I had five more days to go.

"I got in a little extra swimming practice last night coach... My water mattress broke!"

MASTERS DIVING - INDOOR CHAMPIONSHIPS - 1980

USA MASTERS INDOOR NATIONAL CHAMPIONSHIPS
WOODLANDS, TX

May 24, 25, 1980

Results:

Womens 1 Meter

25-29 1	Jan Lucia, El Paso, TX	391.75
2	Ann Kreiner, Woodlands, TX	294.90
39-54 1	Julie Hicks, Woodlands	177.05
50-54 1	Lillian Felderman, Huntington Park, CA	189.90
2	Irene Jenkins, Houston, TX	185.05
55-59 1	Kuni Schults, Houston	220.15
60-64 1	Patty Fulton, Mission Viejo, CA	202.75
2	Candy Pew, Woodlands	127.70
70-74 1	Gerta Ross, Eugene, OR	120.60
2	Freda Thompson, San Diego, CA	103.90
75-79 1	Viola Krahm, Mission Viejo	131.05

Womens 3 Meter

25-29 1	Jan Lucia	384.75
50-54 1	Irene Jenkins	220.10
60-64 1	Patty Fulton	197.00
70-74 1	Gerta Ross	121.75

Womens Grand Master

Group I	Jan Lucia	328.75
Group III	1 Patty Fulton	235.80
	2 Gerta Ross	197.10
	3 Lillian Felderman	186.15
	4 Freda Thompson	160.00

Mens 1 Meter

21-24 1	Takuya Nocuchi, Springs, TX	366.55
2	Mark McClain, Dads Club	359.85
3	Donald Potthoff, Dads Club	316.70
25-29 1	Dave Moreau, Dads Club	480.55
30-34 1	Dave McKeehan, Dads Club	391.25
2	Bill Babinger, Houston	216.45
35-39 1	Darrell Phillips, Baton Rouge, LA	277.00
40-44 1	Fred Fox, Encinitas, CA	329.90
2	Charles Teas, Corpus Cristi	240.10
3	Harley T. Bonham, Kingwood, TX	187.30
45-49 1	Gary Bagley, Long Beach, CA	392.95
2	Alec Dyer, Dads Club	222.85
50-54 1	Ed Craren, Lincoln, NE	265.95
2	Pete Ayer, West Bend, WI	249.60
55-59 1	R.F. Amundsen, Ft. Lauderdale, FL.	205.50
60-64 1	Dick Smith, Woodlands	224.90
2	Dal Stauffer, Downey, CA	215.65
3	Lyle Felderman, Huntington Park, CA	212.35
4	Ted Kersting, Park Ridge, IL	209.00
65-69 1	Ham Anderson, Bellaire, TX	136.40
70-74 1	Bill McAlister, Madera, CA	146.70
2	Jose' Mone', Pico Rivera, CA	112.10
75-79 1	Cecil Bush, Akron, OH	124.00

Mens 3 Meter

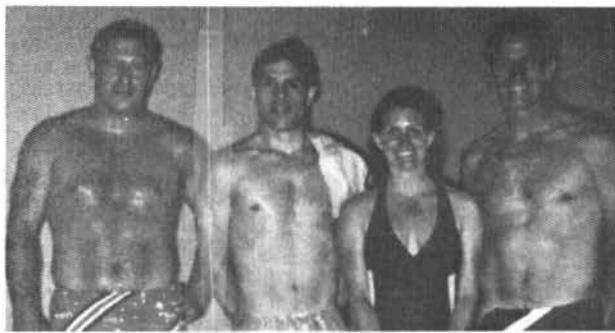

21-24 1	Mark McClain	270.95

NATIONAL SHORT COURSE MASTERS SWIMMING CHAMPIONSHIPS

1. Mildred Anderson, June Krauser, Ransom Arthur, Enid Uhrich - winner of the 'Capt. Ransom J. Arthur M.D. Award' (along with Ed Reed, Sr.) and Ken Kimball
2. Walt and Annetta Pfeiffer from California
3. Jeannette Eppley, Ann Cerny and William Cerny
4. FLORIDA MASTERS' National Record breaking 55+ Women's 200 yard Medley Relay Team - Virginia Gest, Annaliese Zoeller, Zelda Griffin and Bardi Dendy
5. FLORIDA MASTERS' National Record breaking 55+ Women's 200 yard Freestyle Relay Team - Jan Smally, Zelda Griffin, Bardi Dendy and Virginia Gest
6. MARYLAND MASTERS TEAM - Back Row: Barbara Bowman, Don Anderson, Dave Fields, Fred Forshey, Mike O'Heeron, Carl Christensen, Paul Lovett and Carol Chidester
Front Row: Dot Wise, Nancy Brown, Barbara Brand, Marge Ramanauskas, Jeanne Mason and Sarah Allnutt
7. TEXAS GULF MASTERS - Ham Anderson, Graham Johnston, Mildred Anderson, Jim Crane and Tom Boak

1979 WORLD SWIMMING RANKINGS

My thanks to Gary Stutsel for Australian times and to Haike Hofer for West German times. Most countries conduct little competition over the 50 meter course. There are many odd length pools in the World but this listing is restricted to 50 meter pool times only for the year 1979. Hopefully, it will encourage Masters swimmers throughout the World to swim in Long Course meets so their times may be considered for the 1981's WORLD RANKINGS!

HINTS ON DOING THE BREASTSTROKE

The breaststroke rules require the swimmer to keep the head from being submerged except on the starts and turns, and the stroke has to be symmetric; i.e., your right and left arms or legs have to be doing the same thing. Also, the arms and legs must be under water during the race except for the start. The reason why the breaststroke is the slowest of the four basic racing strokes is that the arm recovery occurs under water, thereby pushing water the wrong way.

The kick is probably the most important part of the breaststroke since most people get more power from the legs than the arms. The best way to get the feel of the kick is to use a kickboard and see how few kicks you can take to go the length of the pool. With a reasonable glide, you should be able to negotiate each length with about 12-15 kicks, or 2 yards per thrust. In preparing to kick, the knees should be fully flexed so the heels almost touch the butt. The kick starts out slower than it ends, finishing with a whip motion in which water is pushed backwards mainly by the part of the legs below the knee. The soles of the feet should also be pushing backwards. The size of the angle between the legs, the wedge, is a matter of personal preference. The old wedge kick is used by most old-timers, but the modern breaststroke, with its very rapid turnover, uses a very narrow wedge in the so-called Whip kick. There should be little up-and-down action of the feet, which should be near, but below, the water surface at all times.

The arm stroke supplied Chet Jastremski, the first of the modern breaststrokers, with more power than the legs. In extending the arms forward ahead of you, remember that there is no point in having the palms face down - they should face out to the side, for you will be pulling in that direction. Many people also make the mistake of reaching too high up with the hands. In the full forward extension of the arms, they should be pointed forward and down rather than being perfectly horizontal. The hands should be perhaps 18 inches below the surface of the water. Also, the shoulders should also rotate so that there is shoulder action in the first part of the pull. The hands should pull past the head, shoulders, and the upper chest but too long an arm stroke should be avoided. If the hands are pulled all the way down to the stomach towards the knees you will find that you will go backwards when you try to recover to the starting position. The best way to convince yourself of this is to tie your ankles together and try to do a few laps with only the breaststroke pull. It simply cannot work with too long an arm stroke.

In breathing, the problem is to move the head as little as possible. Every time the head is raised for a breath, the arms have to waste some propulsion by directing force downward to counteract the weight of the head. People who seem to be bobbing up and down a lot must be wasting arm power. Most people tend to breathe just at the point of maximum arm pull, while some racers breathe a little later. However you do it, the rhythm must be maintained.

The "pull out" is the phase of the start or turn spent underwater. At the turn, about 4 seconds pass from the touch of the wall to the head emerging from underwater. You are allowed one arm pull and one kick before the head breaks the surface. The push-off can be maximized by putting your head down so you are looking at your navel and taking as long a glide as is consistent with speed. You have to time your arm pull and the subsequent kick so as to squeeze out every inch of underwater glide distance possible. Don't forget to be exhaling at all times underwater.

Finally, some people claim they just cannot do the breaststroke. This may be an erroneous feeling due to the fact that the stroke feels slow compared to other strokes. Compare your times with those of other people; you may be surprised.

MASTERS SWIMMING NOTES

A SATISFIED SWIMMER - I've been in Masters Swimming about six years now and find it an ever increasingly satisfying and healthy activity. I will never forget the excitement we felt when

found ourselves with a third place in the 45+ women's relay. My individual medals were not outstanding, but for me, a real achievement. That's the best part of Masters; I'll be 60 this summer and am so thrilled to find my achieving days are not over by any means - with always new goals to conquer.....

NEWS OF JOHNNY - At 76, Johnny Weissmuller watches the sea, waiting to die. He has been in Acapulco, Mexico since late 1979 and has been in failing health since 1977. Dr. Ricardo Figueroa comments: "Most men would have been killed by the strokes he's had, but he lives for the reason he was a great swimmer - he has a magnificent, a magnificent heart.".....

YET ANOTHER PLEA - for the 200 fly & 400 I.M. (et al) in the Nationals. One of the major inequities of the National Masters Swimming Program is that there are four events (400 I.M., 200 Fly, 50 Breast, 50 Back) that are part of the National Top Ten program, yet are not swum in the SC Nationals. This imbalance should be corrected as soon as possible. There are several ways and combinations of ways this might be accomplished. I really believe the following scenario/s would be accepted by a majority of Masters Swimmers. GOAL To add the 400 IM, the 200 Fly, the 50 breast and the 50 back to the SC Nationals. MEANS: 1) Do not interfere with the one day reserved for the 1650. That's enough of a project in itself. 2) Add the 200 fly and 400 IM to the two days that do not have the 500 free. 3) Add one of the 50's to the day that

that has the 200 fly and the other 50 to the day that has the 500 free. 4) Call for volunteers to split a lane on the 500 free, said volunteers to swim first. 5) Reduce the number of events entered to five and events swum to four. (This is by far the most controversial of the time reducers. The ones who would be agains it would be the superstars, the wones who finish in the top 3 places in 5 or 6 events.), but it would really open up the competition as there would be less people to compete for more awards, which means the average swimmer would have a much better chance of winning some kind of medal at the Nationals. - Dick Cheadle.....

FINGERS IN THE FREESTYLE - First, with the fore finger in front, find a flowing, free flying feel with the fingers. With the fifth finger, flash the front of the hand forward in a fiery flight from the femur. Finally, fetch (if it's feasible) your feeble forearm frontwards on the favoured flank, and if not fearsomely fatigued, feint the fingers fractionally forward like a fairy.....

SPECIAL AWARD - Rita Shephard of the DC Masters Swim Team was honored with a 'Special Award' at the Seventh Annual Breakfast of Champions in Prince George's County, MD. Each year the Assoc. recognizes the achievements of the County residents aged 18 and younger. An exception to their age requirements was made by honoring Mrs. Shephard for her accomplishments as a Masters Swimmer. Rita, aged 71, placed in the 1979 Top Ten in every event she attempted.....

NEW BOOK - 'Not Afraid To Wade' was written to help Masters Swimmers. It can be ordered from your local bookstore or directly from Strode Publishers, Inc., 720 Church St. N.W., Huntsville, AL 35801. (\$5.95 + \$1.00 for shipping)...

FROM THE NAUTILUS AQUATIC CLUB NEWSLETTER - The age-old claim of swimmers that theirs is the most health-giving of all sports and the one most likely to insure longevity receives more and more confirmation from the medical and scientific communities. Latest to join this parade is the prestigious Hospital Corporation of America, with headquarters in Nashville, TN. The Corporation hands out thousands of dollars in bonuses to its employees who participate in a physical fitness program. And here is how they're paid: 4¢ a mile for bicycling; 16¢ a mile for running or walking; and 64¢ a mile for swimming. And who wroughta know better than the hospital people?.....

RULES - Entry Blank states: Regular AAU Relay Rules apply. Results show, however, that ASSOCIATION relay teams were entered. It is increasingly obvious that our Relay Rules must be clarified. Also, an event is any race or series of races in a given stroke or distance. In a Freestyle event the swimmer may swim any style BUT it is still a Freestyle Event. An attempt will be made to clarify some of these rules for our Masters Swimmers. They are now located in the 1980 Official Rules for Competitive Swimming.....
